On  
21-06-2019

Organised By  
DJMIT Sports Committee  
Dr. Jivraj Mehta Institute of Technology

**DR. JIVRAJ MEHTA INSTITUTE OF TECHNOLOGY**  
**TREE PLANTATION EVENT**  
**ON 21<sup>ST</sup> JUNE 2019**

**REPORT**

SAVE TREES

THEY WILL SAVE YOU

**"FEEL FREE TO PLANT A TREE"**

**INTRODUCTION:**

Our institute combined Tree Plantation Event with International Yoga Day Event. Considering the Indian tradition of preservation of culture, heritage as well as flora and fauna, the combined event was organized by the institute with a motto of showing the importance of Yoga for mental and physical fitness and importance of Trees for the fitness of earth and sustenance of living beings.

During the Tree Plantation Event, about **25 Neem Trees** were planted near DJMIT Ground due to the numerous advantages of Neem Tree. The motive of this event is to take care of our Mother Earth.

**IMPORTANCE:**

Considering the importance of a **platform for action** 'World Environment Day' is encouraged by United Nations since 1974. The event has grown to become a global platform and is celebrated in over 100 countries.

**It is considered as 'The people's Day'** for doing something individually or in a group, locally, nationally or globally to take care of the Mother Earth.

**There is a theme for** each World Environment Day. The theme for 2019 is “Air pollution”.

### **BENEFITS OF NEEM TREE:**

Benefits of neem are known since thousands of years in India. Neem Tree as all know

- Purifies air and reduces air pollution.
- is eco-friendly
- has anti-desertification properties
- is a good carbon dioxide sink and also
- Is a source of environment-friendly biopesticides.
- has high medicinal value and also
- helps in flood control, reduced soil erosion and less salination
- stimulates the immune system, improves liver function, detoxifies the blood and also
- Promotes healthy circulative, respiratory and digestive system.
- Like Pipal and rubber release comparatively larger volume of oxygen into the atmosphere.
- Leaves of Neem are useful in various Ayurvedic preparations.
- Eating few raw neem leaves in the morning is claimed to have purified blood and is also helpful for malaria treatment and for diabetic patients.
- Neem cake and neem oil are pest repellents applied to the plants.
- Neem can be grown outside without protective cage as animals do not browse its leaves owing to its bitter taste.

### **GLIMPSES OF THE EVENT:**

At DJMIT Ground, all were present during plantation including Chairman Shri. Narendra Shrimali, Directors, Principal Dr. Arvindkumar M. Jain, Heads of the Departments, Faculties, Non-Teaching Staff as well as Students.

Event Coordinator and Committee members helped all participants with the necessary arrangements. It was suggested to give name plates for all trees planted e.g. planted by Chairman, DJMIT, by Mech Dept, by PG Students, by GTU Exam Team, by Admin Staff, by Peons, etc.

In order to support restoration the eco-balance of afforestation drive was conducted with sincerity by all present there.

All participants were highly enthusiastic to make it a big success. The students as well as staff planted saplings in the hole dug in the ground and then watered the plant for sustenance.

At the end of the programme, the individual as well as group photos were taken to enjoy the tree plantation activity.
