Dr. Jivraj Mehta Institute of Technology, Mogar.

Dr. Jivraj Mehta Institute of Technology

Computer Engineering Department

Academic year 2020-2021

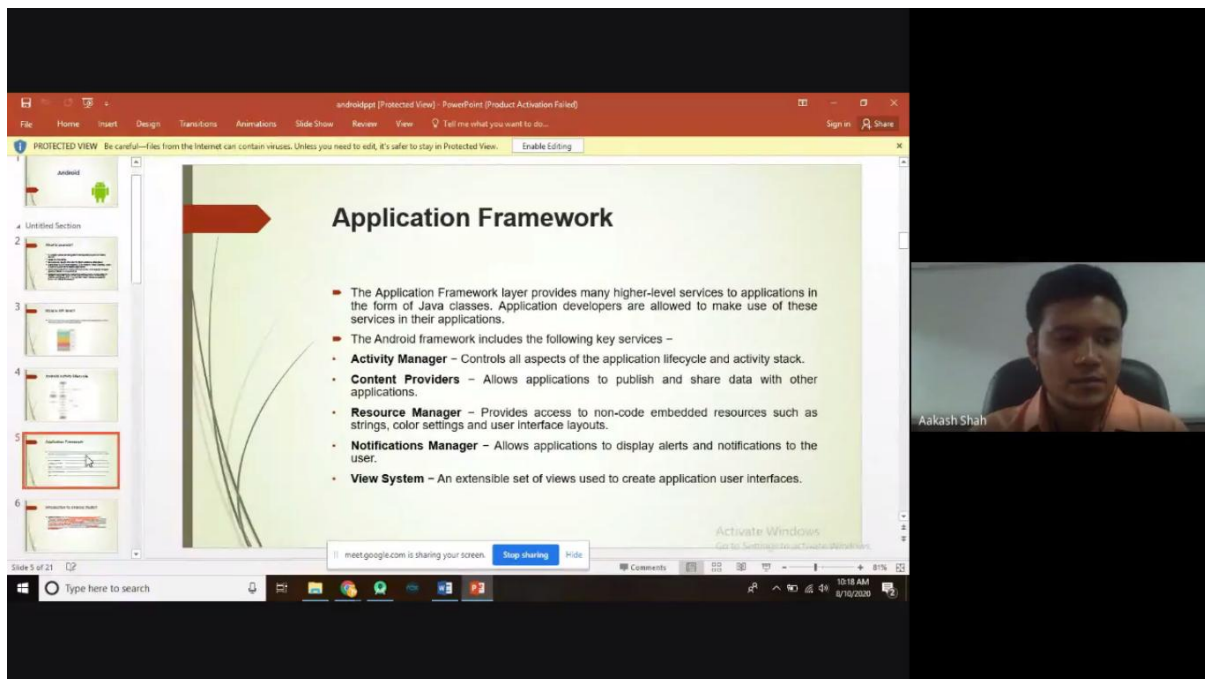

Topic: “Webinar on Android Programming.”

Expert: Mr. Akash Shah & Dr. Sheshang Degadawala.

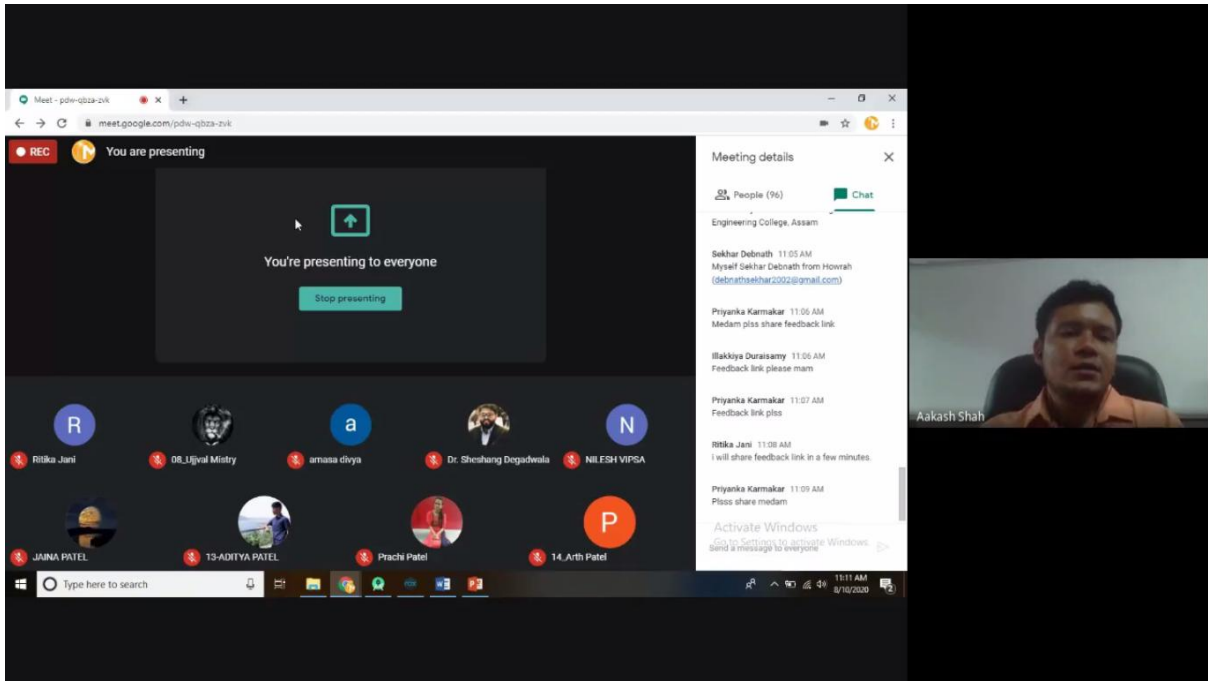

Report:

Computer Engineering Department organized Webinar on Android Programming. The webinar was delivered online through Google meet by Mr. Akash Shah and Dr. Sheshang Degadawala Sir from Om Infosolution from 10:00 AM to 12:00 PM

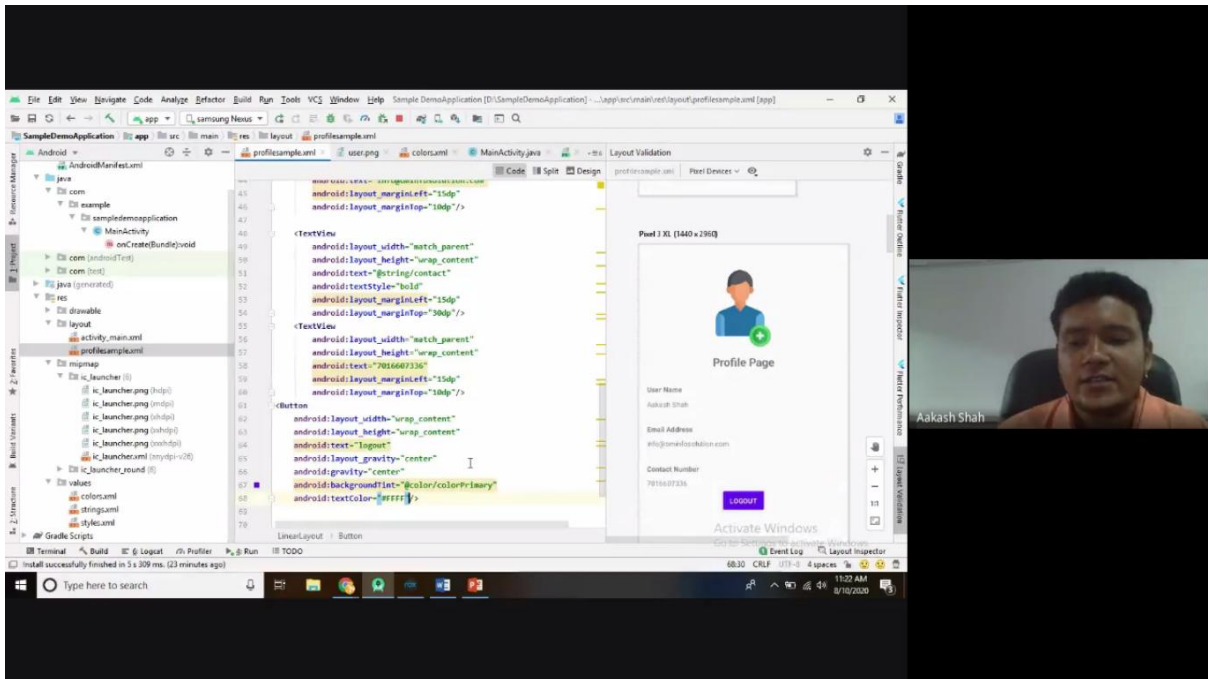

The students of 3rd, 5th and 7th Semester of Computer Engineering branch attended this expert lecture with their respective Faculty Members and HOD sir. Along with the students there were 50+ participants who were from outside of the organization and attended webinar via Google meet. Expert Mr. Akash Shah has presented a detailed talk on Android framework and versions, he has also showed how to build an android application Practically. There were 106 participants were keenly involved in grabbing the knowledge regarding Android Programming.

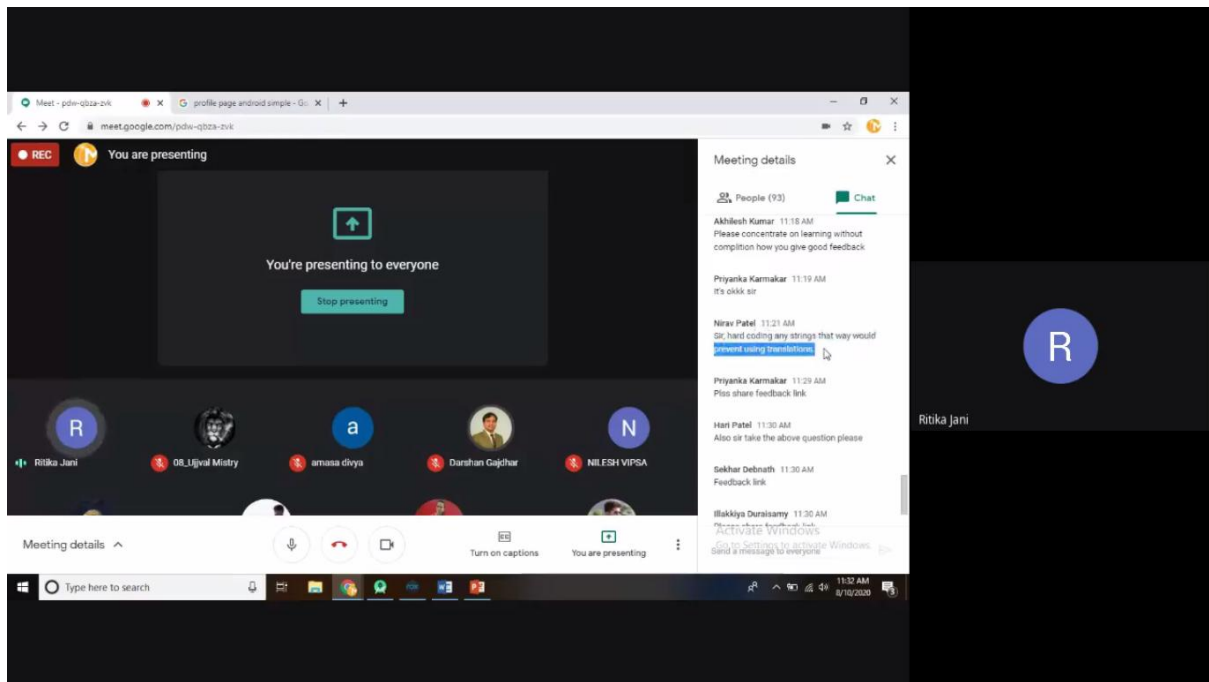

Expert Akash Shah is Conducting Lecture.

Students and Faculties

Demo application made by expert

Q&A session conducted by Expert

Here is the glimpse about Futuristic Technologies in Computer Science:

The topics covered in two hours session are:

- What is Android
- Android Framework
- Android API Level
- Android Version
- Application Framework
- Android Layouts
- Android Application

After the detailed talk regarding the topic, an activity was conducted for the participants where they enthusiastically took part. Overall it was an educational webinar which was beneficial to the students and the Faculty Members by making them aware of various aspects related to Android Programming.
